IML
LABELS

IML NET D.O.O SPECIALISES IN PRODUCING DURABLE IML LABELS.

WHO ARE WE..?

IML NET D.O.O SPECIALISES IN PRODUCING DURABLE IML LABELS.

Our company has developed several types of products based on different levels of durability. The labels we're producing withstand rough handling, mechanical stress and prolonged outdoor exposure. Materials, colours and adhesives are carefully chosen to meet very high durability requests such as high temperature resistance, caustic soda resistance, acid resistance, scratch resistance etc.

Our durable IML labels are not mass produced, which gives us the opportunity to expand our sales internationally.

We are very proud of our technical team, which consists of specialists with high expertise in this field of production. Thanks to them, we can offer you a range of products.

The process takes place during the forming of the product and creates permanently bonded labels which are then integrated into the final product, so no post-production decoration is needed.

The labels are resistant to scratching, cracking and high temperature, making them durable and long-lasting.

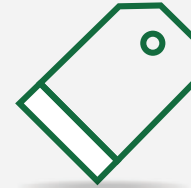

The IML technique is **cost-effective, efficient and fast in production**. Combining the decorating process with the moulding process cuts total costs and the end product is recyclable friendly.

The IML technique offers a lot of variety and over the years, glossy and transparent variations have been successfully developed. Our company frequently works with both white and transparent glosses and all of our labels are available in several different quality finishes.

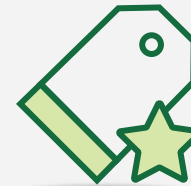

Economic Short Life Labels – Products in this group are disposable and mostly used in food packaging (ice cream, butter, fresh cheese...). The material most often used in production is white 'orange peel' as it is the most economical.

They are not our main product. However, we decided to offer them so we could provide a full product range and keep our customers satisfied.

Economic Medium Life Labels – Medium life labels are usually made according to customer specification. For customers who want to be economical, we offer gloss varnished labels in high resistant colours, finished with a robust anti-scratch varnish. Varnished labels are mostly used for toys, beach accessories, houseware etc.

ECONOMIC
SHORT LIFE LABEL

ECONOMIC
MEDIUM LIFE LABEL

Premium Medium Life Labels – We have gained a lot of experience in this field and we feel really confident about this product. These labels are perfect for houseware accessories created by a high-end brand.

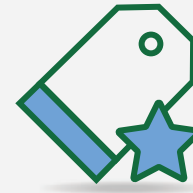

We offer gloss laminated labels to customers who want their products to have a more durable label.

Premium Long Life Labels – For the most robust applications we produce thicker labels out of more durable materials. We always laminate these products. In some applications, UV protection can be built into the label's structure or we can add UV protection to the upper surface of the label with a durable UV resistant varnish. This kind of label is used in beer crate or by floor tile businesses.

PREMIUM

MEDIUM LIFE LABEL

PREMIUM

LONG LIFE LABEL

BEER CREATE LABELS

PREMIUM LONG LIFE LABELS

Considering beer or beverage crates are mostly used for transportation, it is important that they are resistant and durable. This also applies to crate labels, and because of this we are producing premium long life labels.

HOUSEWARE LABELS

ECONOMIC MEDIUM LIFE LABELS, PREMIUM MEDIUM LIFE LABEL

Houseware must be easy to handle and easy to maintain and houseware labels must be both water and soap resistant. This is very important because the products (and their labels) must be able to withstand being washed in a dishwasher.

From our experience, we found that the best label for this application is our medium life laminated label. We reached this conclusion after conducting many test washes in a dishwasher, and we saw that even after a couple of hundred cycles, the label remained the same.

CHILDREN LABELS

ECONOMIC MEDIUM LIFE LABELS, PREMIUM MEDIUM LIFE LABEL

When it comes to children's products, the materials and labels have to be safe for children to use, but also very durable and resistant. It is also important that the products can be easily washed and maintained.

We believe safety comes first and our testing revealed that the best label for this application is our laminated medium life label. Therefore we always recommend laminated labels so the child is safe, even if they put the toy in their mouth and chew on it.

PROMOTIONAL LABELS

PREMIUM LONG LIFE LABELS

Promotional products promote businesses and serve as reminders to customers so it is important they do their job successfully. Regardless of the size of the promotional product, the label has to be scratch resistant and must be easy to maintain.

The best label for this application is again our laminated medium life label.

We offer our existing range of labels for promotional products but we also welcome the challenge of creating new products that meet your unique specifications.

TECHNICAL LABELS

PREMIUM LONG LIFE LABELS

You can find technical labels everywhere – in your kitchen on household appliances, in your workplace on cables and even on your gym lockers.

Most of our company's work with durable labels involves PP and PEHD materials.

We also work with other materials in smaller quantities, but that doesn't mean they are less important. For example, in making a disposable plastic cup, we mostly use PS material. For electric cabinet parts we often use ABS plastic. For electrical household appliances, PC material is often used.
