

DURABLE
IML
LABELS

IML LABELS FOR TOYS AND KIDS STYLE

Our company has developed several types of products based on different levels of durability. The labels we're producing withstand rough handling, mechanical stress and prolonged outdoor exposure. Materials, colours and adhesives are carefully chosen to meet very high durability requests such as high temperature resistance, caustic soda resistance, acid resistance, scratch resistance etc.

Our durable IML labels are not mass produced, which gives us the opportunity to expand our sales internationally.

We are very proud of our technical team, which consists of specialists with high expertise in this field of production. Thanks to them, we can offer you a range of products.

Our production complies with the EC regulation n.1907 / 2006 (REACH) and the Regulation No. 1272/2008 (CLP)"

Premium Medium Life Labels – We have gained a lot of experience in this field and we feel really confident about this product. These labels are perfect for houseware accessories created by a high-end brand. We offer gloss laminated labels to customers who want their products to have a more durable label.

PREMIUM
MEDIUM LIFE LABEL

Economic Medium Life Labels – Medium life labels are usually made according to customer specification. For customers who want to be economical, we offer gloss varnished labels in high resistant colours, finished with a robust anti-scratch varnish. Varnished labels are mostly used for toys, beach accessories, houseware etc.

IML LABELS FOR TOYS AND KIDS STYLE

ECONOMIC MEDIUM LIFE LABELS,
PREMIUM MEDIUM LIFE LABEL

When it comes to children's products, the materials and labels have to be safe for children to use, but also very durable and resistant. It is also important that the products can be easily washed and maintained.

We believe safety comes first and our testing revealed that the best label for this application is our laminated medium life label. Therefore we always recommend laminated labels so the child is safe, even if they put the toy in their mouth and chew on it. remained the same.
